

## Corporate Vision

NAML was established in 2011 as a non-profit public charity based on Muslim principles, and striving to serve the entire community. NAML offers a range of services designed to partner with families, including high quality early childcare, afterschool programs, and community integration as well as residential care for adults with developmental disabilities.

With over a decade of committed service to the community, our vision is to create a world in which individuals, irrespective of their circumstances, become architects of their own success, free from historical biases and systemic inequities that hinder their boundless potential. The primary goal of NAML is to provide impactful services to the community, with a focus on bridging gaps in housing, wealth, healthcare, and education experienced by lower-income residents of Philadelphia.

The growth of NAML's programs has led to an increased demand for our services. In response to this demand, we have decided to establish a dedicated facility that will enhance the delivery of our programs and establish new services to meet community needs. Our vision is to rejuvenate the community by constructing a vibrant mixed-use facility that caters to urgent and well documented needs. This facility will encompass educational services, healthcare services, a grocery store, and affordable housing options.
